

ICA Learning Scope and Sequence

Issaquah Children's Academy (ICA) curriculum grows with your child. As your child matures, his/her developmental needs and focus changes. Research has shown that children learn best when skills and concepts are integrated into themes.

At ICA we promote a child-centered curriculum that promotes growth socially, emotionally and academically. At all age levels your child will progressively build language skills through interaction with their teacher, environment, materials and classmates.

Learning experiences that are age-appropriate for your child

Each ICA Curriculum contains age-specific activities that promote creativity, family involvement, and the development of the whole child. Daily experiences capture and support the learning of important skills and concepts.

Fun and meaningful learning activities

As your child matures and moves to the next classroom, he/she encounters a higher level of learning that challenges growth in their abilities while allowing them to still have fun! Skills range from learning basic colors with younger children to exploring the alphabet with older children. Our toddler computer program begins at two years of age and provides weekly, age appropriate and fun activities.

Access to Program Specialists

Your child has the opportunity to participate in weekly Art, Music & Movement, Spanish and Sign Language classes enhancing their early childhood development. Our highly trained specialists provide a hands-on learning environment where children can grow.

Dear parents(s),

Your child's school has invested in an award-winning and research-supported curriculum supported by HighReach Learning®.

In the classroom your child will experience a well-rounded balance of learning activities and many opportunities to develop important skills needed to be successful in school.

Preparing a child for school involves families, schools, and the community. Experienced, certified teachers and professional program specialists are important to your child's education.

Issaquah Children's Academy utilizes the latest content, ideas, and activities available and adjusts it to meet your child's individual interests and needs.

Information about what your child is learning.

Throughout each month, your child will bring home materials to keep you up-to-date on what he/she is learning at school. Creative art projects, such as painted pictures, collages, and child-created books, are just a few of the items your child may enjoy creating. Be sure to spend time talking with your child about what he/she is learning at school. You'll be amazed to discover how much your child is learning through Issaquah Children's Academy.

Curriculum that is up-to-date on the latest in early childhood education.

Your child's curriculum is developed by a team of early childhood professionals. The team spends a tremendous amount of time studying research articles and trend reports in order to offer your child the greatest in early childhood education.

The experienced and nurturing ICA teaching team brings this curriculum to each student based on their individual interests and needs.

Our Team Approach gives your child access to certified instructors who provide a combined focus to each child's education. Our teams include: Infant/Toddler, Preschool, and Kindergarten/School Age.
